

The city now doth like a garment wear
The beauty of the morning; silent, bare
All bright and glittering in the smokeless
air.

URGES ALLIANCE IN FAR EAST BY U. S. AND OTHERS

Russia, England, Japan and
America Should Reach Agree-
ment, Thinks Editor Ishida

Urging Uncle Sam to form an alliance in the Far East with Russia, England, and Japan, Keikichi Ishida, editor of the Independent Review of Honolulu, writes regarding the situation in the countries bordering on the Pacific.

In his article on the quadruple alliance, Mr. Ishida says:

"Premier Okuma made the announcement to the effect that Japan has entered into a formal alliance with Russia. No one who has a knowledge of recent Far Eastern politics has suspected this political alliance between Russia and Japan.

"Since the conclusion of the peace treaty at Portsmouth, Russia and Japan have understood each other so well that they have become good friends, and it has culminated into the alliance at this time. No one can question that this alliance has been necessitated by events that have happened in the Far East, as well as in the European situation.

"We have little knowledge in regard to the exact contents of the newly formed alliance, yet we are assured that the peace of the Far East will be guaranteed by this alliance, which will eventually lead to the general peace of the world.

"This is the age of an international alliance. Unless a nation has a mighty conviction to carry the burdens of the whole world upon its shoulders, it cannot stand alone with out facing the great danger of destruction, of humanity and justice. Even Great Britain, which was once isolated from the other powers, has felt it necessary to be allied with the others.

"After the present war the clouds of storm and stress will threaten the Pacific. We, the nations bordering on the Pacific, should be ready to meet them united into one body.

"The United States is a great power on the Pacific. If she cares for general peace in the Pacific, she certainly cannot afford to miss the golden opportunity to enter into the alliance with the other powers, and thus make a quadruple alliance. If the four great nations, such as the United States, Great Britain, the Russian and the Japanese, go hand in hand, they can threaten the peace of the Pacific.

"There is no better insurance of general peace in the Pacific than the alliance made among the above mentioned four nations of the world. This is not the age of mere crying of 'Peace, peace,' without taking any practical steps for it."

'WORM TURNS' IN SCHOFIELD GAME

[Special Star-Bulletin Correspondence.]

SCHOFIELD BARRACKS, April 18.—The "worm has turned." After suffering defeat by practically every team in the 1st Infantry Regimental League and ending the season only a step or two from the cellar, the team from the Machine Gun Company ended their season in a blaze of glory by defeating the league leaders by a score of 11 to 8. And it was a game that M. Company, the team at the top of the list, could ill afford to lose. It was M. Company's last game, and they were only one game ahead of F. Company, which has one more game to play. If F. Company wins its game from K. Company on Friday it will leave M. and F. tied for first place.

Whited, Moore and Tarnosky of the Machine Gun Company were the principal wielders of the stick and important factors in the score. Whited got three hits and the other two men got two apiece. Moore's hits were a home run and a two-bagger. Budinski of M. also clouted the ball with might and main, getting three hits out of four times at bat, and one of these was a homer. Dunlap of M. has established a reputation as a run getter and he lived up to it today, for he made three without getting a single hit.

R. H. E. Co. 002310220—11 10 5
Co. M. 100121103—9 10 9
Batteries—Steadman and Eckstein for Machine Gun Company; Turyski and Lyle for Company M.
Home runs—Budinski, M.; Moore, M. G. Co. Two-base hits—Morrison and Miles, M. and Moore and Whited, M. G. Co.

Final statements of the revenues of the Panama-Pacific exposition give the grand total of receipts for admission and the concessions at \$12,524,000.

It has cost the city of New York \$2,000,000 for snow removal this season.

NEW PROVINCE TO TAKE PART IN REVOLUTION

(Special Cable to Liberty News.)
SHANGHAI, April 18.—After many months of waiting, Ngan Hwui province will take a part in the present war. The first news to come from this province since the beginning of the war tells of a victory for the republicans. The military governor of this province, Yee See Chung, has held the situation well in hand, and the revolutionists made no attempt to take the province.

Four days ago Yee See Chung left Ngan Hwui for Peking. During his absence the revolutionary sympathizers induced his troops to revolt against Yuan Shih-Kai. Yee heard of the action, and hurried back from Peking, and ordered his troops to take no part in the revolution. The troops refused and have joined the revolutionary forces.

Ngan Hwui province is directly west of Kiang Su and Chi Kiang provinces and occupies a strategic position commanding the Yangtze Kiang river for a great distance. This province is the center of the great green tea district, and is rich in resources.

Reports from Ningpo state that the revolutionists are not in favor of Wat Young Kwong, the military governor of Chi Kiang, and that although he has announced his independence of Yuan Shih-Kai they do not trust him, and efforts are now being made to replace him with a governor who is known to favor the revolutionary movement.

WEIRD DESIGNS FOR KITES IN MILLS CONTEST

Skeleton kites, paired eagle kites, Charlie Chaplin kites, aeroplane kites, pyramid kites, spider kites, fan kites, dragon kites and kites of half a hundred other varieties will be flown at Mills school tomorrow afternoon. The contest will begin at 2:30 o'clock when the distance kites will be placed in the air.

Silver cups will be awarded to the winners of each event, contests being for beauty and uniqueness of design, and for fighting and distance qualities. The largest kite made so far is one of Hawaiian pattern which measures eight and a half feet across its face.

Judges for the contest are Frank C. Atherton, Miss Hedges of Kawaiahae Seminary and Dr. A. L. Andrews of the College of Hawaii.

The kite committee from the school faculty is composed of Miss E. J. Jones, M. L. Copeland and John F. Nelson. The members say that owing to the enthusiasm with which the boys are working they count on the most successful contest ever held. Chairs will be placed on the campus for spectators.

IN WAR ARENA

BRITISH CABINET CRISIS
ON CONSCRIPTION AVERTED.

LONDON, Eng., April 19.—The London Daily News, in a leading article printed this morning, says that a compromise has been reached and that the cabinet crisis over the conscription question has been averted. The cabinet has adopted the principle of general conscription, but no attempt is to be made to put the principle into effect at present. It is, however, decided that general service will be brought into play later should it be found necessary in order to win the war with Germany.

NONCOMBATANTS SUFFER IN
TEUTON SUBMARINE WARFARE.

LONDON, Eng., April 19.—The press bureau of the war office here last night gave out a statement dealing with the casualties from the submarine and mine warfare conducted by Germany. Since the outbreak of the war, 317 noncombatants have lost their lives in maritime disasters due to mines or submarines of the enemy. Of these there have been 1754 seamen, 188 fishermen and 1175 passengers.

FRENCH DEPUTIES PUSH
CLOCK AHEAD ONE HOUR.

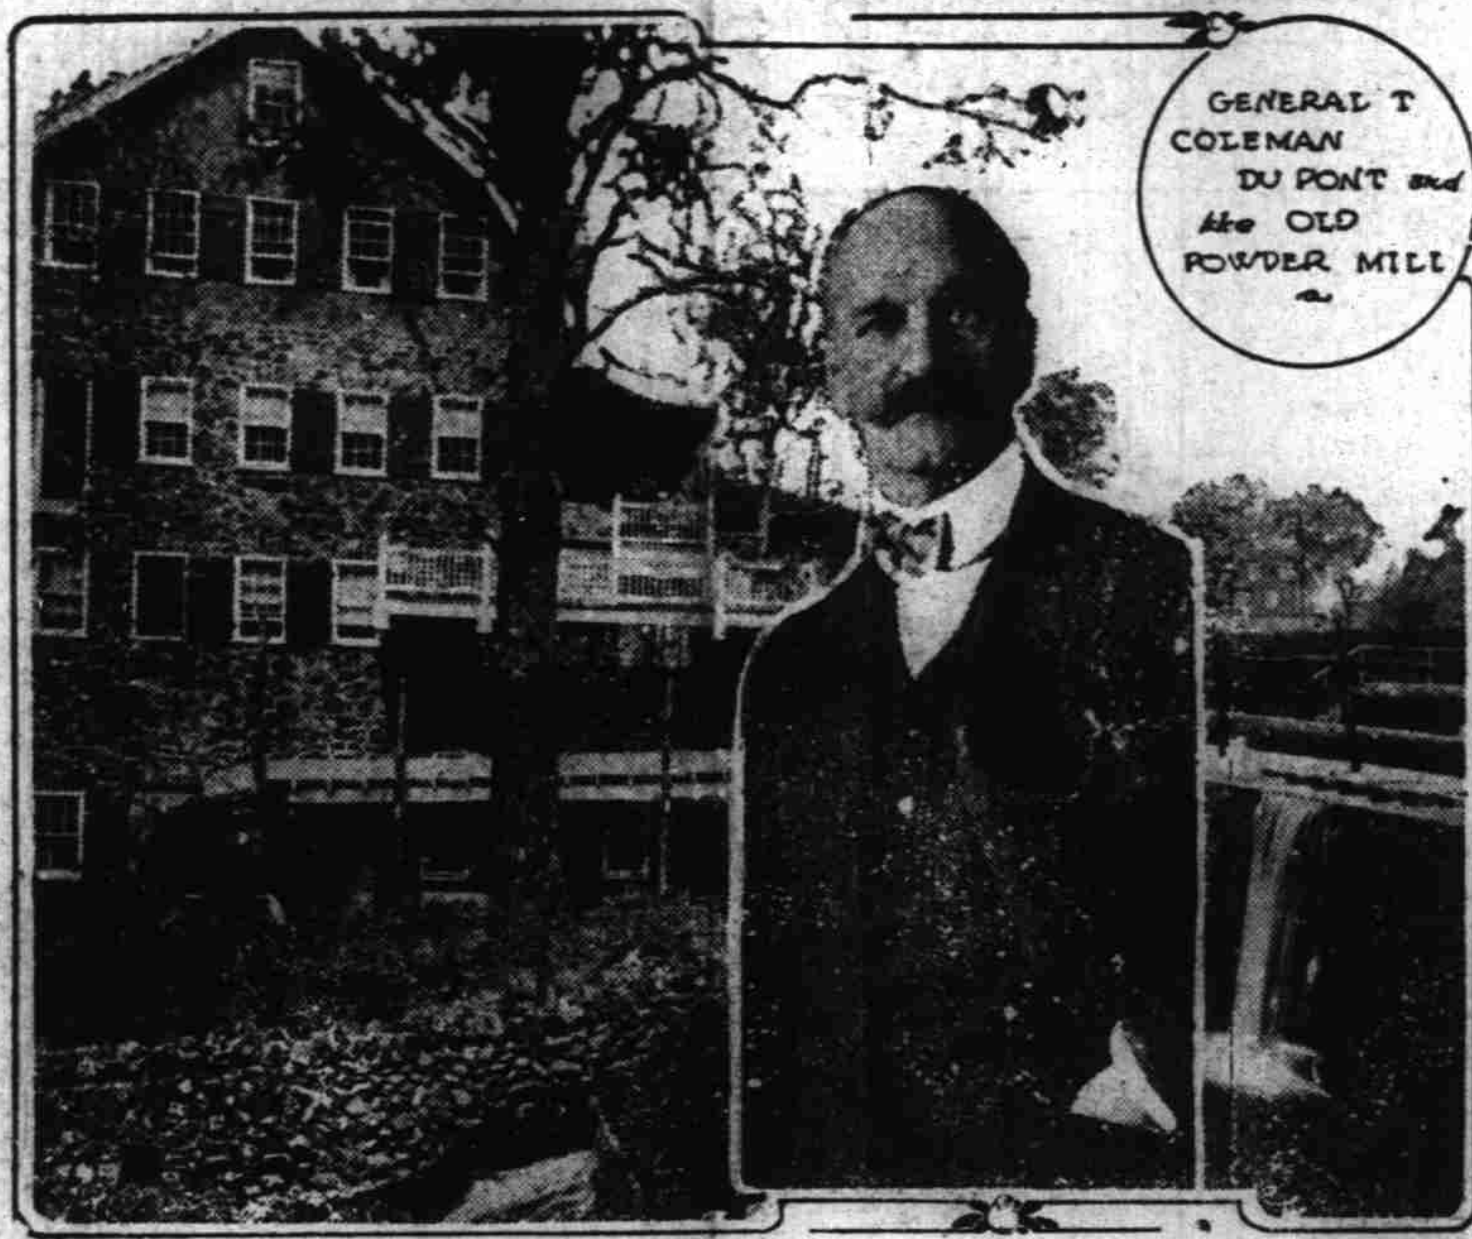

PARIS, France, April 19.—The chamber of deputies yesterday adopted the proposal to advance the legal time one hour for the duration of the war. The purpose of the measure is to increase the activities of the nations during the daylight hours, and economize the consumption of gas and coal. A similar measure was adopted in Germany some time ago.

DEMOCRAT WINS IN LOUISIANA PRIMARIES

(Associated Press by Federal Wireless.)

NEW ORLEANS, La., April 19.—Ruffino Pleasant, former attorney general under the administration of Governor Luther Hall and the regular Democratic candidate for the post won easily in the primaries held in Louisiana yesterday. This practically assures his election at the polls in November.

DUPONT, A NEW PRESIDENTIAL CANDIDATE

GENERAL T.
COLEMAN
DU PONT and
the OLD
POWDER MILL

Enter a new candidate for the Republican presidential nomination in the person of Thomas Coleman DuPont, of Delaware.

With the Republican national convention barely two months in the future the G. O. P. seems utterly at a loss as to what man to name for President. There are a dozen hats in the ring, but none that carries the plume of a winner like the white plume of Henry of Navarre. Hence a new contender for presidential honors becomes an object of immediate and widespread interest.

General DuPont, accordingly, has the spotlight. He is hailed as a candidate upon whom the business men of the country—big business men and small, laboring men and farmers, who, after all, are the most important business men in the country—can unite.

DuPont himself has been a success in many lines of endeavor. As a miner and a member of the miners' union—he spent two years with a pick and shovel at the job of digging out the coal mines from the wreckage of a coal-mining engineer and mine operator, builder of steam and electric railroads, director of great industrial corporations and the genius who gave New York one of its greatest hotels and its greatest office building, his career has been one of construction. He is essentially a

creator and a builder, and never a speculator.

Fought for Clean Politics.

In politics his labors have been equally constructive. He has always stood and fought for clean politics and for progress along real progressive lines. When J. Edward Addicks, familiarly known as "Gas" Addicks, undertook to tuck the state of Delaware in his vest pocket and make himself United States Senator, it took Thomas Coleman DuPont, first as a member and then as chairman of the Republican State Committee, to purge the state of Addicksism and effect the political regeneration of Delaware. Later as a member of the Republican National Committee, General DuPont stood with the Roosevelt forces in the memorable fight of 1912 at Chicago. He was one of the fifteen members of the Committee who voted for the seating of Roosevelt delegates. He did not follow Colonel Roosevelt into the Progressive party—his loyalty to and faith in the Republican party was too strong for that.

Personally, General DuPont is six feet three in height and weighs above the two hundred mark. He is what the late Alfred Henry Lewis would have called "a great big, two-fisted, he-man." Blue-eyed and square-jawed, he is a born fighter. By antecedents he is an aristocrat, as was Thomas Jefferson, yet he is one of the most democratic of men—a democrat with a small "d," but at the same time a Republican with a big "R."

One of his greatest interests is road building. He has proposed to give the people of Delaware a boulevard, 200 feet wide and 100 miles long, running from one end of the state to the other, and in the work on this road he has lived with the builders and run a road roller with his own hands.

General DuPont was formerly at the head of the great powder making concern that bears the family name, but he severed his connection with it at the outbreak of the European war. He said he did not want to be identified with the manufacture of powder for use in foreign wars. Sentiment, however, has led him to make a summer home of the old stone mill on the Brandywine where his forefathers ground the powder that was sent out through the wilderness of the Middle West a century ago to enable Commodore Perry to win the battle of Lake Erie.

General DuPont is in his prime—fifty-three years of age. At 6'4" a great political figure. He himself has not yet said that he is a candidate for President, but if he enters the lists it is a foregone conclusion that he will be a big factor in what happens at Chicago next June.

CHAMBERLAIN ARMY BILL GOES THROUGH SENATE WITH A RUSH

Gravity of Foreign Situation
Prods Solons Into Quick
Action

(Associated Press by Federal Wireless.)

WASHINGTON, D. C., April 19.—Spurred to instant action by the gathering diplomatic clouds on the international horizon the senate yesterday rushed through the passage of the Chamberlain bill, providing for the increase of the standing army to a quarter of a million men, and the organization of reserve aggregating three quarters of a million more.

The first step in this action, which was taken amid great excitement, was the passage of an amendment increasing the regular army to 250,000. This was made part of the senate bill by a vote of 43 to 37.

The upper house then took up the consideration of the bill as a whole and after a comparatively short debate passed it with a determination that left no doubt of the attitude of the senators toward preparedness.

The federal volunteer reserve plan was reserved in the act as finally passed, although it had been the target for many attacks. This feature of the bill, it was said, will give an estimated strength to the service of 261,000 trained men.

The measure also federalizes the National Guard, giving an estimated strength of 280,000 fighting men.

INSPECTORS FOR ALL METERS IS NOW SUGGESTED

Meters, both gas and electric, will be inspected by an expert employed by the public utilities commission whenever a consumer complains of unfair bills, if a suggestion made by Chairman Charles R. Forbes at yesterday's meeting is carried out. He declared that the commission has power to establish rules and regulations governing public utilities that in large cities on the mainland the consumer could have his meter tested on request and he thought some provision should be made for testing here.

Complaint was registered at the meeting that the toll exchange operator at Schofield Barracks often collected a dime for a city connection and then failed to make the connection. The secretary was instructed to take it up with the Mutual Telephone Company.

May 14 the commission is to hold a meeting on Maui to dispose of the utilities investigations for that island. Between now and then they will finish the investigations of the Mutual Telephone Company, the Kauai Telephone Company and the Waioli Electric Company, set the rate for power

JUDGE ASHFORD WILL NOT CALL GRAND JURORS

Though no session of the territorial grand jury has been held for two months, it is not likely that a call will be made soon. This was decided by Judges Ashford, Whitney and Sutherland yesterday in a conference over the situation.

Men awaiting trial are being held in jail at the present time, and have been for some months past, the delay arising from the fact that the courts do not have sufficient money to pay jurors.

Judge Ashford said after his conference with the other jurists that he had decided not to order the grand jury to meet, that the judges are not to blame for the situation, and the responsibility must rest where it belongs.

By a vote of 7 to 6, the New York Assembly Excise Committee killed the local option and state-wide prohibition bills.

to be furnished the Hilo Traction Company by the Hilo Electric Light Company and make their report to the governor on the proposed amendments to the traction company's franchise.

Is there a reason why
people should patronize
you? If there is, why not
tell Honolulu all about it.
People will do a whole lot
of things—if they have a
good reason.
—THE AD MAN.

JAPAN STATESMEN CONFER ON CHINA AND U. S. IMMIGRATION BILL

TOKIO, Japan, April 19.—Count Okuma, premier of Japan, and Baron K. Ishii, minister of foreign affairs, were received by the emperor at the palace yesterday. The statesmen discussed the situation in China, and the new immigration bill of the United States.

TO NAME FIVE DIRECTORS AND ONE TRUSTEE OF "Y"

Successors to five directors and one trustee are to be nominated on April 27 by the nominating committee of the Y. M. C. A. to fill the three-year terms of Ed Towse, C. B. Ripley, Robert Anderson, George C. Potter and Robbins Anderson, and the four-year term as trustee of H. M. von Holt, expiring April 30. The nominating committee consists of Robbins Anderson, Harold C. Dillingham and C. H. Atherton.

While the nominating committee favors the reelection of these officers whose terms expire with the end of this month, they will be glad to receive any other nominations by any member of the Y. M. C. A. at the office of the chairman, 303 Stangenwald building.

YUAN BREAKS DOWN

(Special Cable to Hawaii Hochi.)

TOKIO, Japan, April 19.—Yuan Shih-Kai is ill, according to despatches received here last night. The strain under which he has been for some time, owing to the revolution, has proved too much for him, and his health is said to have broken down. He is now in bed suffering from a high fever. He is delirious, it is reported, and talks continually and irrationally, declaring that China has been invaded by the Japanese.

LARSEN CALLS FOR POLICY OF RETRENCHMENT

"Retrench! Retrench!" cried Supervisor William Larsen at last night's meeting of the board. "We will be \$70,000 in the hole when we leave office unless we stop right now and count our pennies."

He was talking on an appropriation bill for \$1000 for playground equipment ordered last December and now on the wharf. Appropriation was made at the time, but the amount was not sufficient and the park committee had to come to the board for more money. Larsen didn't want to give it to them, and he said so. "We can't afford it," he declared, emphatically. "We haven't got the money."

Again he called for a conference of the heads of departments with the supervisors meeting as a committee of the whole to decide how and where the city could cut its expenditures. This has been a pet project of Larsen and he has called for the conference at many meetings. Last night he got the usual support of his proposal—but no date was set.

Larsen is worrying over the permanent improvement fund. He says that there is but \$82,000 in it now and that when the \$30,000 for Manoa and \$10,000 for Lualaba improvements are taken out it will look pretty small.

The resolution calling for the \$1000 appropriation for playground equipment was passed with but one dissenting vote—Larsen's.

FUNSTON WANTS MORE TROOPS TO BACK PERSHING

Telegraphs War Department
Leader of Invading Army
Needs Reinforcements

(Associated Press by Federal Wireless.)
SAN ANTONIO, Tex., April 18.—Gen. Funston last night telegraphed the war department a request for 2500 more troops to meet the crisis which appears to be growing more acute in Mexico. In his despatch Gen. Funston stated that Gen. Pershing is in actual need of these additional men.

CHILDREN HATE PILLS, CALOMEL AND CASTOR OIL

If Cross, Feverish, Constipated,
Give "California Syrup
of Figs"

Look back at your childhood days. Remember the "dose" mother insisted on—castor oil, calomel, cathartics. How you hated them, how you fought against taking them.

With our children it's different. Mothers who cling to the old form of physic simply don't realize what they do. The children's revolt is well-founded. Their tender little "insides" are injured by them.

If your child's stomach, liver and bowels need cleansing, give only delicious "California Syrup of Figs." Its action is positive, but gentle. Millions of mothers keep this harmless "fruit laxative" handy; they know children love to take it; that it never fails to clean the liver and bowels and sweeten the stomach, and that a teaspoonful given today saves a sick child tomorrow.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly on each bottle. Beware of counterfeiters sold here. See that it is made by "California Fig Syrup Company." Refuse any other kind with contempt.—Adv.

BRITISH STEEL EMBARGO HITS JAPAN SHIPBUILDERS

(Special Cable to Hawaii Shingo.)
TOKIO, Japan, April 19.—The report that Britain has shut down upon the export of iron or steel, caused a panic among shipbuilders throughout Japan. Efforts are already being made to buy materials in the United States.

Forest fires burned over nearly 300,000 acres of national forest land in 1915, according to reports just compiled.

The engineer and fireman of "Chicago Flyer" of the Grand Trunk Line were killed when a collision with a freight train occurred near Port Credit, near Toronto.

Four thousand pounds of dynamite exploded at the Indiana & Ohio Stone Quarry near Green castle, Ind. One hundred men were working about the quarry but none were killed.

START ON MANOA PAVING NOT YET DEFINITELY SET

City Hall Circles Say Much Depends on Attitude of Taxpayers

Work on Manoa improvements may begin next week. Or it may be delayed another three months. It all depends on the contractor's attitude. He is said to feel that he should make certain of the attitude of Manoa property owners toward the improvement before he puts his men to work. That means that it may be six or seven weeks before actual construction begins.

As soon as the assessment ordinance passes third reading and is signed by the mayor it is legally possible for the contractor to be signed and the contractor can begin work.

The ordinance has passed first reading and will come up for second reading before the board tonight. At the next meeting of the supervisors, probably a week distant, it will undoubtedly pass the board. Then the mayor will sign it, the contract will be signed, and all will be ready. The contractor, F. R. Ritchie of San Francisco, can start work if he wants to.

The next step is for the tax assessor to call for the payment of the assessments against each piece of property. The city will promptly pay its share, close to \$50,000, and there will be that much money in the improvement fund. Many of the assessments will be paid in full at once, according to advance indications. Others will be divided into 10 installments and the first installment only paid.

At the end of 30 days the assessor will notify the city of the amount that is to be paid in installments and a bond issue will be authorized by the supervisors to cover this. As soon as they have legal assurance that this bond issue will be taken up they can compel the contractor to start work. But the bond sales has to be advertised and set for four weeks after the publication of the first advertisement. When the bonds are sold, some three months from now, the money to pay the contractor will be all available.

It is said in the city hall that if the contractor sees that Manoa people are for the improvement scheme, will pay many of the assessments in full and promptly attend to the arrangements for installments, he will start work while the assessments are being collected. Otherwise he will wait until he is legally compelled to begin.
